Visitor Institution Staff

Tech and Design Firms

Educational Institution (Faculty & Students)

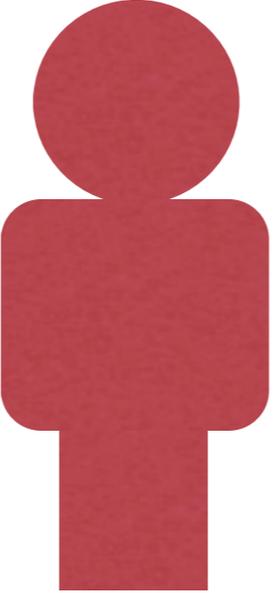

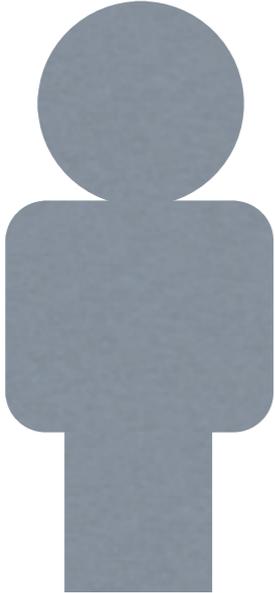

I'm not sure I have the expertise to do anything with Open Exhibits.

I plan on implementing an exhibit or two. I assume it will involve light modification of existing templates - but obviously I won't know for sure until I dig in!

i just need to make more time to check out Open Exhibits.

Research for peer reviewed journal articles, book chapters, technical papers, extend into the classroom.

We plan to introduce graduate students into the field of interaction design and exhibit design. work with artist associations and museums in the area to develop new interaction initiatives and collaborative research.
